To whom it may concern,

The community workshops were great today at McPherson and St. John's.

It would have been helpful to have demographic data per neighborhood that showed a breakdown of ethnicity, income and home owners vs. renters. To answer #4 from the worksheet: **These are very important markers for determining districts and ensuring equitable representation for all City of Napa residents.**

I am submitting to you a link to an online map I created using the districtr.org platform: <https://districtr.org/edit/2919>

I was able to use the "data layer" and at least draw that map with ethnic boundaries in mind. I would very much like to see one or two districts in our community with great representation of hispanic and low-income residents, as they deserve a voice, too!

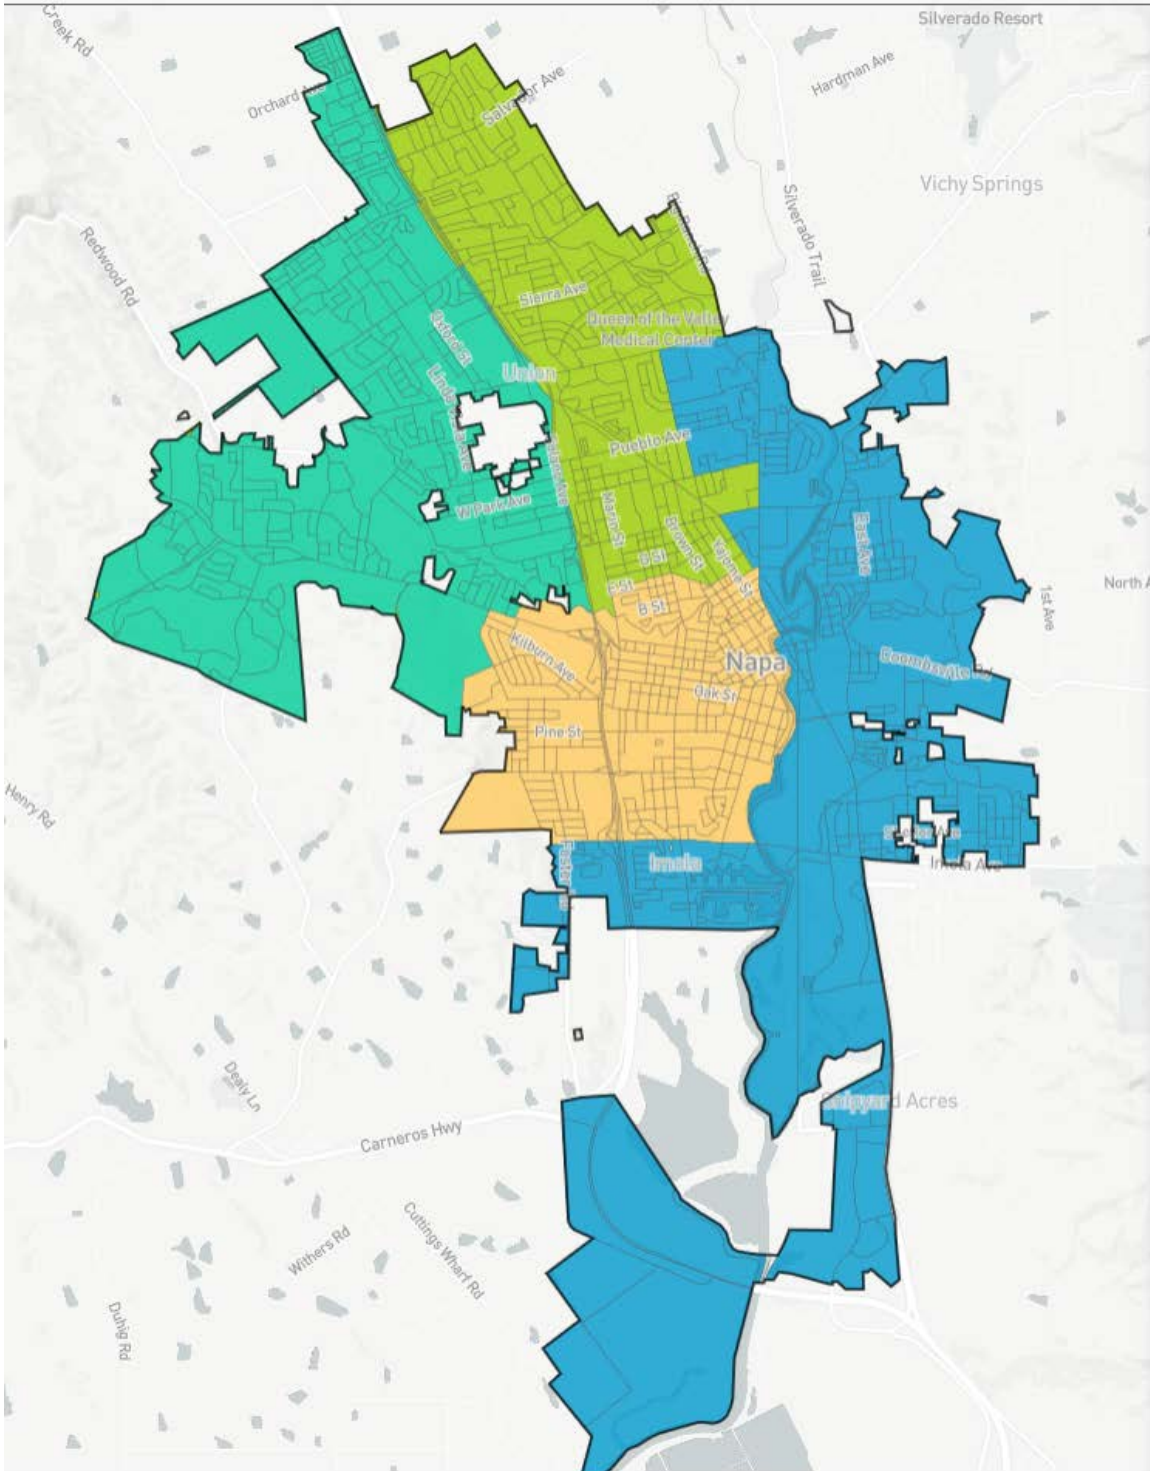

Thank you for your consideration and for allowing the people to be a part of the process.

Respectfully,

Bailie
