NNSSP: Napa Neighborhoods Streets & Sidewalks Program. This includes the sidewalk repair work managed by the Public Works Operations Division that repairs public sidewalk and concrete walkways in residential areas. The program separates each neighborhood within the City as a separate project area and the neighborhood sidewalk and paving are accomplished together. The City is able to accomplish approximately two to three complete neighborhoods per year.

Priority Location: This is a specific place, typically tracked by address, that a concrete sidewalk displacement exists, has been evaluated through the prioritization system and ranked with very high benefit for accelerated repair due to large vertical uplift, high pedestrian volumes, and/or close proximity to schools. Every report of damaged sidewalk is documented and considered for a priority location repair. The City has a goal to complete 50 priority location repairs per year, in addition to the repairs made as part of the NNSSP.
